### Custom Architectural Metalwork

Omni Fab is your one source for custom architectural aluminum, bronze, and stainless steel fabrication. Omni Fab has extensive experience in custom metal fabrication. This experience has allowed us to successfully undertake unusual projects, those not customarily seen or thought of. We cut, form, weld, and finish metal with quality workmanship and standards. Custom sizes, small quantities, and custom finishes are no problem. We believe that we have the imagination, skills, and experience to make a contribution to solve your design problems. We offer our services in a cooperative effort with the design professional to bring his concepts to reality. We provide state of the art computer-aided design along with fabrication for precision controlled processes to ensure tight manufacturing tolerances. Examples of completed projects include aluminum panel systems, bronze handrails, stainless steel entrances and aluminum sunscreens.
